UI/UX design

### Hobbies

Open-source Contribution

UI and Graphic design

Trying new technologies

Business's Case study

## About Me

I am passionate developer who loves to build real world applications with professional design and deep diving into different technologies. I made my first open-source contribution in Jan 2023 in Supabase. Further I aim to build projects that solves real problem and provides high quality user experience.

## Experience

May 2023 - Jul 2023 Remote

Full-stack Developer & UI design intern  
**Medref**

Medref is early stage startup where I was hired as an intern but later worked more like a Tech lead where I studied market and designed UI accordingly from scratch after which I was assigned to lead tech team. There I created application architecture and worked on UI design, Front-end, Back-end & Database design from ground up which later helped startup securing second round of funding.

**Tech & Tools** - Figma, NextJS, Django, Django Rest API, Postman, Supabase, Postgresql & React Native.

## Latest projects

### Twitter Clone - Frontend

Twitter Clone app including major features like tweet, like, comment, follow/unfollow, Authentication and protected actions.

NextJS, Tailwind, Supabase DB

### React Chat App - Frontend

React chat app that includes real-time chat functionality using email-id and authentication.

React, Supabase DB

### Airbnb Clone - Frontend

It includes implementation of property search with calendar and map with property location.

NextJS, SSR, Mapbox, Tailwind

### Notes Pro - Fullstack

Powerful website + dashboard template for your next Chakra UI project.

React, Django, Django rest API
